The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/521,822	<b>Applicant(s)</b> MATHIEU, CHRISTOPHE	
	<b>Examiner</b> Michael C. Wimer	<b>Art Unit</b> 2821	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Morizumi et al. (EP 1 014 302).

Regarding Claims 1-11, Morizumi et al. show in Fig. 4, a single/sole loop antenna 10 and method for forming thereof, a support 11, the loop 13 having two contact zones 17a and 17c defining capacitor plates, the capacitor is mounted and electrically connected in parallel with the loop 13 and formed on a surface of the insulating support. The conductors forming the structure are printed in steps with conductive ink, as set forth in Claims 6-10. It would have been obvious to the skilled artisan to employ gravure printing to define all conductors and insulators (e.g., 14 and 17b).

Regarding Claims 2 and 3, frequency of operation is an obvious one to the skilled artisan. Regarding Claims 4, the thickness is less than 10 micrometers, i.e., 2 micrometers. The chip 12, as recited in Claims 5 and 10, is shown connected as claimed.

### ***Response to Arguments***

3. Applicant's arguments filed 11/13/2007 have been fully considered but they are not persuasive. Specifically, the loop antenna is a continuous single loop, albeit several turns. In the alternative, an additional loop would be one is electrically and physically separate, not defining a sole loop.

***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
